1 Business needs

Revelle Aesthetics is looking for a solution to allow shoppers to upload a PDF or Doc file into their customer record. This file will generally contain their tax exempt information, but if required Revelle customer service may use this page to have customers load other documents such as sale agreements when needed.

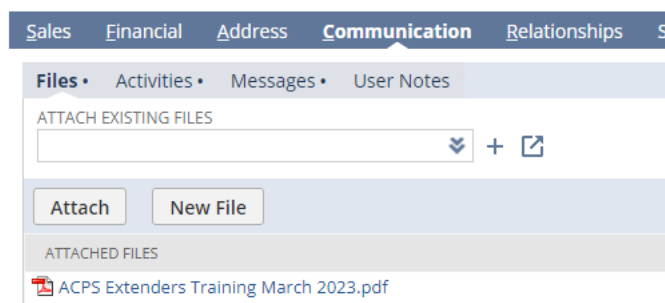

2 Impacted areas/modules [Optional as output]

This solution will require a creating a new custom page within My Account. This page will include an instruction text block, a space to load a file, and a button to submit the file.

3 Acceptance criteria

My Documents page will appear between Profile and Email sections under Settings. It will appear below the Additional Information page when its loaded.

Customers are able to load a Doc or PDF file via this page and it will show up within the Customer Record under Communication:

4 Solution proposal

Create a new page within My Account which will allow a customer to load a file into NetSuite.

- Create a new page within My Account in accordance with our existing solution.
 - This page will be called My Document.
 - This page will be located between Profile Information and Email Preferences.

Home > My Account

Profile Information

Email Preferences

Address Book

- - If Additional Information page is visible it is assumed it will appear after it.
 - When viewing this page, above the field where customers can insert the file to be downloaded a block of text will be included. Revelle will use this field to call out instructions for the customer.
 - This field should give the customer the ability to update the information displayed via translations. This means each field will have a unique label/value. All updates to these fields will be managed within Configuration Record > Multi-Domain > Translations. For reference:
 - **Success Message** - Message used to create the case that will track the file being uploaded
 - Go to the **Configuration Record > Multi Domain > Translations** and configure the following keys/entries with the desired verbiage:
 - FILE_UPLOAD_FORM_TITLE
 - FILE_UPLOAD_SUCCESS_MESSAGE
 - FILE_UPLOAD_SECTION_TITLE
 - FILE_UPLOAD_FORM_DESCRIPTION
- Revelle wants the file deposited into the customer record, under files as shown in the screenshot below:

CRM ID NUMBER

The screenshot shows the Oracle NetSuite CRM interface. At the top, there are tabs for 'Sales', 'Financial', 'Address', 'Communication', and 'Relationships'. The 'Communication' tab is selected. Below this, there are sub-tabs for 'Files', 'Activities', 'Messages', and 'User Notes'. The 'Files' sub-tab is active. Under 'Files', there is a section titled 'ATTACH EXISTING FILES' which includes a search bar, a dropdown arrow, a plus sign, and a share icon. Below this are two buttons: 'Attach' and 'New File'. At the bottom, there is a section titled 'ATTACHED FILES' which shows a single file: 'CUS0356_Trial_4 Beauty Aesthetic Institute for Plastic Surgery.pdf' with a PDF icon.

5 Prerequisites

GUIDELINE FOR THIS SECTION (DELETE TEXT BELOW ONCE THIS SECTION IS COMPLETED)

This section should list any prerequisite needed by the solution.

[This section is optional as final output on the document. The contents of this section will depend on if a prerequisite exists or not. Although the section is optional it must be part of the analysis process to determine if it is needed or not.]

For example:

- *The Payment Instruments feature must be enabled.*
- *The payment gateway has been configured.*
- *Etc.*

(DELETE TEXT ABOVE ONCE THIS SECTION IS COMPLETED)

6 Assumptions

- *Revelle will be responsible for creating and maintaining their own alerts notifying them when files are uploaded*
- *Revelle is aware and accepting that they will be responsible for managing and removing files as needed to prevent them running out of space in the file cabinet.*

7 Constraints and limitations

- *Anything not explicitly called out in this document is considered out of scope and would need another job.*

- *Use only available SuiteCommerce Extensibility component classes to customize the extensions.*

8 Risks

- *These changes could be broken by future updates. Additional work may be needed at that time to correct and fix this custom extension.*
- *If working with SCS and CSS rules are being used to achieve certain behavior then the theme could be updated in the future and the CSS rules might no longer work (although this is highly improbable the risk exists).*

Oracle + NetSuite Professional Services and Customer are in agreement that the information documented above is accurate and representative of the customer's business needs. This document will act as the basis for all subsequent implementation activities.
